DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David L. Terrell on 09/26/2006:

The non-elected claims 1-13, and 21-23 have been cancelled.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

This communication is an Examiner's reasons for allowance in response to application filed on 03/01/2004, assigned serial 10/790,382 and titled "Navigational Device for Installation in a Vehicle and a Method for Doing same".

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The applicant's amendment and arguments filed on 07/18/2006 have been fully considered. After carefully reconsidering the application and the applied prior art, the examiner has realized the current application is patentably distinct from the prior art. The prior art are not deemed strong to make the application unpatentable.

The references to Chang and Hashida are applied in the previous rejection. However, after carefully studying the cited prior art, the examiner has realized neither Chang nor Hashida fairly discloses or suggests "amounting assembly mounted in an open port of a vehicle resulting from removal of a non-navigational component, the

mounting assembly mounting the navigational device and generally linearly raising and lowering the mounted navigational device between at least two linear viewing positions, such that in a first, raised position, only a lower portion of the display may be viewed, and in a second, lowered position, substantially all of the display may be viewed", "a mounting assembly for mounting the housing within the open port and configured such that the housing may be linearly raised and lowered between at least two linear viewing positions, wherein in a first, raised position, approximately one-thirds to three fourths of the housing is positioned within the open port, and in a second, lowered position, approximately none to one-half of the housing is positioned within the open port, and further such that the housing may be pivoted left and right relative to the open port".

The cited prior art also fail to disclose: "a mounting assembly mounted in an open port of a vehicle resulting from removal of a non-navigational component, the mounting assembly including a support plate riding up and down a generally linear stem to generally linearly raise and lower the mounted navigational device among three generally linear viewing positions, such that in a first, stowed position, substantially none of the display can be viewed, in a second, intermediate position, only a lower portion of the display may be viewed, and in a third, lowered position, substantially all of the display may be viewed".

None of the prior art has been found fairly teaches or suggests such the limitations as now claimed. Therefore, claims 14-20, and 24-27 are now set in a condition of allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985. The examiner can normally be reached on from 8:00AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Keith can be reached on 571-272-6878.
